The highly-flexible, compact C-FLEX laser combiner allows you to combine up to 6 wavelengths of the 28 available wavelengths with modulation options for all wavelengths and configurations for single or dual outputs and optional fiber coupling.

The C-FLEX laser combiner harnesses the quality and reliability of the Cobolt high performance lasers. It is field upgradeable and ready to mount lasers from the Cobolt 06-01 Series, 08-01 Series, and 04-01 Series. The C-FLEX design allows for full flexibility in the choice of laser technology, ranging from plug and play diode lasers to high power, single frequency diode pumped lasers.

The robust design of the C-FLEX laser combiner provides excellent long-term stability in output power and beam overlap, as well as outstanding flexibility in terms of laser wavelength and type, which makes it ideally suited for use over a wide range of applications. C-FLEX can be fully customized, or is available as application-specific configurations which are tailored to deliver the optimum performance and features for applications in optogenetics, fluorescence microscopy, raman spectroscopy, or holography.
